

## 360 Phone's Q5 and Q5 Plus models embark PEARL by OT eSF

# CONNECTIVITY

POSTED ON 10.11.16

OT (Oberthur Technologies), a leading global provider of embedded security software products and services, today announces that 360 Group, a leading Internet, mobile and security company in China, selected OT's embedded secure element (eSE), PEARL by OT®, to enable mobile security services on their newly launched Q5 and Q5 Plus smartphones.

Launched by 360 Group in June last year, the 360 Phone brand is already very popular in China with already over 4M smartphones delivered as of end 2015.

With already 225Mu+ deployments worldwide, PEARL by OT® offers a banking-grade security level thanks to an EAL5+ and EMVCo certified component with the largest memory available on the market. This unique multi-application platform also supports access control, biometrics and secure storage use-cases. It is the safest possible place to store and process confidential user information and to execute sensitive applications.

Thanks to PEARL by OT®, 360 Phone is protecting credentials and data applications against software and hardware attacks, ensuring that Q5 and Q5 Plus mobile devices are strongly authenticated and that information stored on the eSE and exchanged over networks remains protected to ensure users' data integrity and confidentiality, starting with their fingerprints and passwords.

With the growing trend of smartphones being used as payment devices or storing and processing sensitive biometric data, users' authentication, data protection and privacy are increasingly critical for our OEM\* customers. We are very pleased that a leading Chinese company such as 360 Phone selected our eSE, PEARL by OT®, to secure mobile services on its flagship smartphones.

Pierre Barrial, Managing Director of the Connected Device Makers activity at OT

As we wanted to deliver the highest security level to Q5 and Q5 Plus users, it was really important for us to rely on an embedded Secure Element expert such as OT. Their eSE enables us to offer unattained levels of security and privacy protection to 360 Phone customers.

Alan Lau, VP at 360 Phone
