

## **IDEMIA PayCheck September: From single- to multipurpose**

Insights into recent developments in the payment eco-systems, and examples how card issuers can leverage these trends

# FINANCIAL INSTITUTIONS

POSTED ON 09.18.20

# EVERYDAY DEVICES

Customers all over the world are continuously looking for ever more convenience. Amid this trend, devices that were originally conceived for a single purpose have been transformed into key objects present in more and more aspects of our daily lives.

The smartphone is the most obvious example, but other **wearables** such as watches, wristbands and even rings are equipped with ever more functionality. A positive customer perception combined with increased contactless POS penetration is likely to propel **payments** from wearables for years to come.

## TRANSFORMING FROM SINGLE- TO MULTI-PURPOSE

... of consumers are willing to make a **wearables payment**<sup>1</sup>

... of global **POS** devices will be **contactless-enabled** by 2024<sup>2</sup>
