

Who will lead the IoT market in 2025?

CONNECTIVITY

POSTED ON 09.28.16

In 2025, the top three adopters of the Internet of Things will be China, the United States and Japan, according to a study from Machina Research. While China is a nose ahead of the US in connections (21% compared to 20%), the USA will be leading in terms of revenue share with 22%, China following with 19%. Japan is forecast to make 7% of all IoT connections in 2025, gaining 6% of the revenue share.
