

IDEMIA Secure Transactions and Vantiva Collaborate to Propel 5G-Powered Fixed Broadband Internet Access with Advanced eSIM Technology

With the anticipated rise in Fixed Wireless Access (FWA) connections to foster digital inclusion and expand internet access in the coming years, this collaboration leverages IDEMIA Secure Transactions' advanced eSIM technology with Vantiva's FWA Consumer Premises Equipment (CPE) expertise. This will provide robust, high-speed internet and TV services, ensuring seamless connectivity and improved network performance, transforming the broadband landscape for residential and business customers.

CONNECTIVITY

POSTED ON 10.22.24

IDEMIA Secure Transactions is proud to announce this strategic collaboration with Vantiva to expedite the deployment of 5G services for customers and businesses worldwide. Formerly known as Technicolor, Vantiva, is a global leader in delivering innovative, comprehensive products for the connected home market — such as broadband gateways and set-top boxes — to the world's foremost Network Service Providers. This collaboration will see IDEMIA Secure Transactions provide Vantiva with the latest generation of eSIM (eUICC) technology, enhancing the capabilities of Vantiva's 5G Fixed Wireless Access (FWA) portfolio.

The two companies aim to deliver robust 5G solutions that offer seamless integration with existing infrastructure, and for the end-user, a simple connectivity activation thanks to IDEMIA Secure Transactions eSIM with embedded native connectivity. This initiative will make it easier for network service providers to deploy FWA services. It will remove the need for shipping a pre-provisioned SIM card or a QR code for service activation of Vantiva's Consumer Premises Equipment (CPE) devices onto the network while improving the connected home experience.

The deployment of Vantiva's 5G FWA solutions, embedding IST's eSIM technology, will transform the broadband landscape. FWA is increasingly recognized as a permanent solution for delivering full internet access to homes and businesses, especially in regions where fiber or cable rollout is limited.

End-users in urban, suburban, and rural areas will access to high-speed broadband services without the need for additional infrastructure, since cellular networks are being rolled out largely on all continents to support mobile services. For instance, families in rural areas with limited fiber or cable options will enjoy high-speed internet and TV services through Vantiva's 5G-enabled residential gateways and associated set-top box, enhancing their ability to stream content, work from home, and participate in online learning.

We are proud to present this collaboration with Vantiva to further extend the availability of our cutting-edge eSIM technologies. The combination of IDEMIA Secure Transactions' and

Vantiva's expertise will enable more people and businesses to be securely connected to the broadband Internet, opening up ever more opportunities.

Philippe DE OLIVEIRA, SVP Automotive & IoT at IDEMIA Secure Transactions

Collaborating with IDEMIA Secure Transactions enhances our state-of-the-art 5G Fixed Wireless Access CPE portfolio. Our NSP customers will benefit from a simplified subscriber enrollment process, improved cost efficiency, and future-proof technology that meets the evolving demands of the digital age.

Thibaud LEPAGE, FWA CPE Product Line Director at Vantiva

About IDEMIA Group - IDEMIA Group unlocks simpler and safer ways to pay, connect, access, identify, travel and protect public places. With its long-standing expertise in biometrics and cryptography, IDEMIA develops technologies of excellence with an impactful, ethical, and socially responsible approach. Every day, IDEMIA secures billions of interactions in the physical and digital worlds.

IDEMIA Group brings together three market-leading businesses that enable mission-critical solutions:

- **IDEMIA Secure Transactions** is the leading technology provider who unlocks safer and easier ways to pay and connect.
- **IDEMIA Public Security** is a leading global provider of biometric solutions that unlock convenient and secure travel, access, and protection.
- **IDEMIA Smart Identity** leverages the power of cryptographic and biometric technologies to unlock a single trusted identity for all.

With a global team of nearly 15,000 employees, IDEMIA Group is trusted by over 600 governmental organizations and more than 2,400 enterprises in over 180 countries. For more information, visit www.idemia.com and follow @IDEMIAGroup on X.
