

IDEMIA Secure Transactions Named PQC Star in MarketsandMarkets Report

Recognized as one of the top global leaders shaping the future of post-quantum cybersecurity.

CYBERSECURITY

POSTED ON 03.12.26

IDEMIA Secure Transactions (IST) has been named a “Star” vendor—one of the top global leaders—in the 2025 Post-Quantum Cryptography (PQC) Company Evaluation Report by MarketsandMarkets. This distinction places IST in the highest-performing category of the report’s Company Evaluation Matrix, which recognizes vendors with strong market presence and robust PQC product capabilities.

Key Highlights from the MarketsandMarkets Report

- ➔ **Top-Tier “Stars” Quadrant:** IST ranks in the quadrant reserved for vendors with broad PQC capabilities and strong adoption across industries.
- ➔ **Comprehensive PQC Portfolio:** The evaluation acknowledges IST’s quantum-resistant identity and authentication technologies.
- ➔ **Global Footprint:** IST is recognized for its global deployments across critical sectors, including BFSI, government and defense, IT, and healthcare.
- ➔ **Key Enabler:** The report highlights the accelerating need for crypto-agile, quantum-resilient infrastructures, positioning IST as a key enabler of this transition.

A Growing Need for Quantum Ready Security

MarketsandMarkets notes that organizations are preparing for quantum-level threats and the long-term risks posed by “harvest now, decrypt later” attacks. IST’s placement in the “Stars” category reflects its ability to support this shift with scalable, standards-aligned cryptographic solutions.
