

Users will be able to make **contactless mobile payments** in store using their JCB branded credit, debit, and prepaid cards enrolled in their Google Pay, at places such as convenience stores, supermarkets, drug stores and other shops where QUICPay is accepted.

To enable **Google Pay** for **JCB cardholders**, JCB leverages an agnostic and scalable **payment card** tokenization and digitization infrastructure, the JCB Tokenization Platform (JTP). It relies on IDEMIA's field-proven **digital payment solution**. It allows not only JCB, but also its issuing and

processing partners to integrate with Google Pay and offer real-time enrolment, provisioning and tokenization capabilities. Users in Japan can, therefore, add their **JCB cards** in the **Google Pay app** on their Osaifu Keitai-compatible phones equipped with Android 5.0 or higher version.

We are delighted to be able to provide our customers with the ability to use Google Pay by leveraging QUICPay's wide acceptance network in Japan. We believe the service will enhance the convenience and experience for JCB card members with the simple and intuitive user interface. JTP plays an integral part for making this happen, and we are proud to have worked with IDEMIA, who has a proven track record in this area, in order to add the Google Pay capability to the platform.

Masaki Yokawa, Executive Vice-President for Brand Business at JCB

We are proud to have worked together with JCB in the deployment of Google Pay in Japan. This represents another milestone in our long-term partnership. IDEMIA is the mobile payment enablement partner of choice for JCB, by offering IDEMIA's field-proven Digital Enablement Platform. IDEMIA's technology and services are deployed at scale with tens of millions of cards digitized so far across the world.

Nobuyoshi NEZU, Representative director at IDEMIA Japan

QUICPay is the contactless payment product developed by JCB for the Japanese market. QUICPay is a registered trademark of JCB for its contactless payment solution.

Osaifu-Keitai is the Standard mobile payment system, only available to subscribers in Japan. Osaifu Keitai is a trademark of NTT DOCOMO, INC.

About IDEMIA - OT-Morpho is now IDEMIA, the global leader in Augmented Identity for an increasingly digital world, with the ambition to empower citizens and consumers alike to interact, pay, connect, travel and vote in ways that are now possible in a connected environment.

Securing our identity has become mission critical in the world we live in today. By standing for Augmented Identity, we reinvent the way we think, produce, use and protect this asset, whether for individuals or for objects. We ensure privacy and trust as well as guarantee secure, authenticated and verifiable transactions for international clients from Financial, Telecom, Identity, Public Security and IoT sectors.

OT (Oberthur Technologies) and Safran Identity & Security (Morpho) have joined forces to form IDEMIA. With close to \$3 billion in revenues and 14,000 employees around the world, IDEMIA serves clients in 180 countries.
