

## OT-Morpho becomes IDEMIA, the global leader in trusted identities

The result of the merger of Oberthur Technologies (OT) and Safran Identity & Security (Morpho), the OT-Morpho group today became IDEMIA. The group's ambition is to empower citizens and consumers to interact, pay, connect, travel and even vote securely while taking advantage of the opportunities of an increasingly connected world.

POSTED ON 09.28.17

At an event that brought together nearly 2,000 guests at the Seine musicale (an iconic cultural venue in the west of Paris, France), Didier Lamouche, Chairman CEO of OT-Morpho, officially renamed the group **IDEMIA**. In a world directly impacted by the exponential growth of connected objects, the increasing globalisation of exchanges, the digitalisation of the economy and the consumerisation of technology, IDEMIA stands as the new leader in trusted identities placing “**Augmented Identity**” at the heart of its actions. As an expression of this innovative strategy, the group has been renamed IDEMIA in reference to powerful terms: Identity, Idea and the Latin word idem, reflecting its mission to guarantee everyone a safer world thanks to its expertise in trusted identities.

This event furthermore provided an opportunity to discover all of the group's latest innovations. These include the automated air passenger boarding process, the new generation biometric payment card, and embedded security systems to equip the connected cars of tomorrow.

Supported by a workforce of 14,000 employees from all over the world, including 2,000 in the Research and Development department, IDEMIA is the result of the merger between OT and Morpho completed on 31 May 2017. Today a leading player in the identification and authentication sector, the group serves clients in 180 countries and provides services to five main customer segments: Financial Institutions, Mobile Operators, Connected Objects, Citizen Identity, and Public Security.

*Our future will be built through innovation and disruption which will revolutionise our daily lives. Our vision when we merged OT and Morpho was to build a new offer capable of revisiting the world of digital security. And this is what the creation of IDEMIA has achieved. Thanks to our talented people and the solutions they invent, citizens and consumers can now connect, interact, exchange, pay, travel or even vote in total confidence, drawing on the benefits of a connected world.*

*The accomplishment of this promise is what we call Augmented Identity. It is about using the biometric characteristics of each person as a unique signature of individual identity, thus facilitating exchanges. It fosters confidentiality and trust and guarantees secure, authenticated and verifiable transactions. This is a decisive step towards a more frictionless,*

safer world.

Didier Lamouche, CEO of IDEMIA.

**OT-Morpho** - devient IDEMIA, le leader des identités de confiance dans un monde de plus en plus digital, et a l'ambition de donner aux citoyens comme aux consommateurs la possibilité d'interagir, de payer, de se connecter, de voyager et de voter en tirant profit d'un environnement désormais connecté.

Sécuriser notre identité est devenu essentiel dans le monde dans lequel nous vivons. En nous engageant pour l'Identité Augmentée, nous réinventons notre manière de penser, de produire, d'utiliser et de protéger cet atout, que ce soit pour les individus ou pour les objets. Nous assurons la confiance et le respect de la vie privée en garantissant que l'ensemble des transactions soient sécurisées, authentifiées et vérifiables pour des clients internationaux des secteurs financiers, des télécommunications, de l'identité, de la sécurité et de l'Internet des Objets.

Avec près de 3 milliards d'euros de chiffres d'affaires, IDEMIA est le résultat de la fusion entre OT (Oberthur Technologies) et Safran Identity & Security (Morpho). Cette nouvelle entreprise compte 14 000 employés de plus de 80 nationalités et sert des clients dans plus de 180 pays.
