

Morpho Licence2Go: the Digital Licence platform from OT-Morpho

OT-Morpho, a world leader in digital security and identification technologies, has launched through its Australian subsidiary Morpho Australasia, an innovative solution for digital licences, aptly named Licence2Go.

POSTED ON 07.25.17

The platform allows the holders to **dematerialize identification documents** in their smartphone, benefiting from security and flexibility, with availability 'Anywhere, anytime, on the go.'

The main **licence app** is complemented by a verification app, whereby police or others requiring ID checks can verify the details of the licence holder without needing to hold the device. Licence2Go works on the principle of Privacy by Design, and at all stages, control of personal data remains with the device owner. Contactless verification takes place between devices, with no personal data transmitted, even in areas away from mobile coverage. Depending on the level of authority required for a specific transaction, the licence holder is able to choose which information is shared (Name, address, DOB*, etc.). Licence details can be visually verified in-person or online, where facial verification can be used in the case of secure transactions such as loan applications.

Morpho Australasia is working with Transport authorities among others to customize the solution and brand the apps with the design of the issuing authority. The company has already begun a pilot study with an Australian Transport authority and is working to produce further pilots around the Asia-Pacific region in the second half of 2017.

Licence2Go is able to connect identity from the physical world into the digital world. We have had some great feedback from several jurisdictions and look forward to when leaving the physical document at home is no longer a problem.

Tim Ferris, OT-Morpho, managing director for Morpho Australasia

The most obvious application for the platform is with digital driving licences, but the concept is readily adapted elsewhere within government services and in the private sector, including membership cards, loyalty cards and corporate identification cards.

About IDEMIA - IDEMIA, the global leader in Augmented Identity, provides a trusted environment enabling citizens and consumers alike to perform their daily critical activities (such as pay, connect, travel and vote), in the physical as well as digital space.

Securing our identity has become mission critical in the world we live in today. By standing for Augmented Identity, an identity that ensures privacy and trust and guarantees secure, authenticated and verifiable transactions, we reinvent the way we think, produce, use and protect one of our greatest assets – our identity – whether for individuals or for objects, whenever and wherever security matters. We provide Augmented Identity for international clients from Financial, Telecom, Identity, Public Security and IoT sectors.

With close to \$2.5 billion in revenues and 13,000 employees around the world, IDEMIA serves clients in 180 countries.
