

The Sultanate of Oman selects Safran Identity & Security to deploy a single multi-biometric platform

Safran Identity & Security, a global leader in identity and security solutions, has been selected by the Sultanate of Oman to consolidate within a single multi-biometric platform the country's multiple identification systems. This sovereign platform, to be operated by the Sultanate, has been launched to support both public security and the development of tourism in the country.

JUSTICE & PUBLIC SAFETY TRAVEL

POSTED ON 04.11.17

A pioneer in deploying **biometric solutions** in this part of the globe, the Sultanate of Oman has been a historic partner of Safran Identity & Security. For example, the company provided the local authorities with the **AFIS (Automated Fingerprint Identification System)** system, as well as the **identification system** for expatriate workers through **iris recognition**.

Safran identity & Security's **ABIS (Automated Biometric Information System)** platform will enable the various solutions to communicate with each other and manage all the **biometric databases (fingerprint, facial recognition, iris and DNA)** within a unified system. The ABIS will provide **biometric services – enrollment, identification, verification** – on behalf of all national systems involved in ensuring the security of the Sultanate: civil identity, public security, border control and criminal identification.

We are very honored that the Sultanate of Oman has renewed its confidence in Safran Identity & Security after an intense competitive bidding to deploy this unique system in the world. This contract allows us to consolidate our relationship with Oman and strengthen our local presence through sustained investment, especially in the area of high technologies.

Samuel Fringant, Executive Vice President, Security Division at Safran Identity & Security

OT-Morpho - is now IDEMIA, the global leader in trusted identities for an increasingly digital world, with the ambition to empower citizens and consumers alike to interact, pay, connect, travel and vote in ways that are now possible in a connected environment.

Securing our identity has become mission critical in the world we live in today. By standing for Augmented Identity, we reinvent the way we think, produce, use and protect this asset, whether for individuals or for objects. We ensure privacy and trust as well as guarantee secure, authenticated and verifiable transactions for international clients from Financial, Telecom, Identity, Security and IoT sectors.

With close to €3bn in revenues, IDEMIA is the result of the merger between OT (Oberthur Technologies) and Safran Identity & Security (Morpho). This new company counts 14,000 employees of more than 80 nationalities and serves clients in 180 countries.
