

IDEMIA Brings Cutting-Edge Fingerprint-Matching Algorithms to Local Law Enforcement Agencies

IDEMIA STORM ABIS will allow small agencies to gain easy and affordable access to world-class biometric matching technology

JUSTICE & PUBLIC SAFETY

POSTED ON 09.13.21

IDEMIA, the biometric solutions leader for law enforcement agencies, announced today it has launched the world's first SaaS-based Automated Biometric Identification System (ABIS), IDEMIA STORM ABIS™, for intuitive, accessible and affordable fingerprint analysis, comparison and documentation.

IDEMIA STORM ABIS is an intuitive, web-based platform that allows for efficient access to world-class fingerprint-matching technology. It supports local and national searches with tools for analysis, comparison and case management that allows fingerprint examiners to efficiently complete examinations from anywhere. With user experience as a design priority, the system enhances collaboration while reducing the learning curve for examiners, which cuts training time and costs for agencies.

IDEMIA has delivered high-performing biometric identification systems hosted in the cloud since 2015. Yet IDEMIA STORM ABIS is first of its kind as its cloud-native architecture allows dynamic scalability, high availability, and system reliability on-demand. Designed from the ground up by fingerprint examiners for examiners, STORM will transform how we deliver automated fingerprint identification capabilities to our law enforcement customers.

Michael Hash, vice president, justice and public safety, IDEMIA

As an out-of-box SaaS ABIS, IDEMIA STORM ABIS drastically streamlines the system deployment and delivery process with standardized configurations. Leveraging native cloud architecture, this new SaaS offering offers continuous feature updates and allows smaller agencies to use the biometric identification services securely from anywhere, enabling a flexible and remote work environments, a useful feature in the post-COVID world.

IDEMIA STORM ABIS is now available and will be presented at IDEMIA's Public Security Users Conference Sept. 14-16 in Naples, Florida.

About us - IDEMIA, the global leader in Augmented Identity, provides a trusted environment enabling citizens and consumers alike to perform their daily critical activities (such as pay, connect and travel), in the physical as well as digital space.

Securing our identity has become mission critical in the world we live in today. By standing for Augmented Identity, an identity that ensures privacy and trust and guarantees secure, authenticated and verifiable transactions, we reinvent the way we think, produce, use and protect one of our greatest assets – our identity – whether for individuals or for objects, whenever and wherever security matters. We provide Augmented Identity for international clients from Financial, Telecom, Identity, Public Security and IoT sectors. With close to 15,000 employees around the world, IDEMIA serves clients in 180 countries.
