

Honeywell and IDEMIA announce strategic alliance to develop intelligent building offering

Integrates Honeywell security and building management systems with IDEMIA's biometric-based access control systems to create a more seamless experience for buildings of the future

POSTED ON 02.10.21

Honeywell (NYSE: HON), a global leader in connected buildings, and IDEMIA, the global leader in Augmented Identity, today announced a strategic alliance to create and cultivate an intelligent building ecosystem that provides a more seamless and enhanced experience for operators and occupants alike. The alliance will integrate Honeywell's security and building management systems with IDEMIA's biometric-based access control systems to create frictionless, safer and more efficient buildings.

The Honeywell and IDEMIA alliance is intended to design solutions that will allow occupants to easily and securely have contactless engagement with a building – from vehicle recognition at the car park and automatic elevator calls to biometric-based access and personalized conference room settings. With a focus on security and data privacy, these next-generation solutions will provide occupants with a safer, more efficient and more enjoyable experience that will help building owners attract tenants.

We recognize that our customers need to deliver business outcomes like managing complex security requirements and providing healthier, more productive environments. By working with IDEMIA we will create an intelligent building ecosystem that better addresses our customers' key challenges and drives their desired outcomes. Whether it's a commercial office building, a hospital or an airport, we have the ability to change the way people experience and interact with buildings for the better.

Manish Sharma, vice president, chief technology and chief product officer for Honeywell Building Technologies

We look forward to expanding our long-standing relationship with Honeywell to bring greater value to our customers with more integrated solutions that make for a more seamless building experience. The ability for our technology to easily integrate with Honeywell safety and security systems will provide building owners and operators more insight and control into creating more efficient buildings, while putting the occupant experience first.

Matt Cole, CEO, Secure Enterprise Transactions Division, IDEMIA

IDEMIA's field-proven AI-based products and solutions — like MorphoWave™, a contactless fingerprint device that scans four fingerprints in less than one second; VisionPass, the most advanced facial recognition terminal; or

Augmented Vision, a biometric video analytics platform — integrate with Honeywell security and building management systems. Honeywell's systems include Pro-Watch Integrated Security Suite, MAXPRO Cloud and Enterprise Buildings Integrator.

Honeywell and IDEMIA will work together to deliver more powerful integrations through aligned product creation and joint product roadmaps. The integrated offerings will allow building operators to respond rapidly and effectively to alarms or incidents by providing an incident workflow package that allows Standard Operating Procedures (SOPs) to be configured, reducing compliance exceptions, security risks and response times.

IDEMIA products also support Honeywell's **Healthy Buildings** solutions that help building owners improve building environments, operate more cleanly and safely and encourage sustained compliance with changing building standards, safety guidelines, government-issued regulations and a company's risk management policies. Honeywell's Healthy Buildings solutions provide a holistic view of a building's health based on key factors such as indoor air quality, occupant flow, personal protection equipment (PPE) analytics, contactless access, thermal screening, social distancing and sanitation efficacy.

About us - IDEMIA, the global leader in augmented identity, provides a trusted environment enabling citizens and consumers alike to perform their daily critical activities (such as pay, connect and travel), in the physical as well as digital space.

Securing our identity has become mission critical in the world we live in today. By standing for augmented identity, an identity that ensures privacy and trust and guarantees secure, authenticated and verifiable transactions, we reinvent the way we think, produce, use and protect one of our greatest assets – our identity – whether for individuals or for objects, whenever and wherever security matters. We provide augmented identity for international clients from financial, telecom, identity, public security and IoT sectors. With close to 15,000 employees around the world, IDEMIA serves clients in 180 countries. For more information, visit www.idemia.com or follow @IDEMIAGroup on Twitter.

About Honeywell Building Technologies - Honeywell Building Technologies (HBT) is a global business with more than 18,000 employees. HBT creates products, software and technologies found in more than 10 million buildings worldwide. Commercial building owners and operators use our technologies to help create safe, energy efficient, sustainable and productive facilities. For more news and information on Honeywell Building Technologies, visit <http://www.honeywell.com/newsroom>.

Honeywell (www.honeywell.com) is a Fortune 100 technology company that delivers industry specific solutions that include aerospace products and services; control technologies for buildings and industry; and performance materials globally. Our technologies help aircraft, buildings, manufacturing plants, supply chains, and workers become more connected to make our world smarter, safer, and more sustainable.
