

IDEMIA provides SK Telecom in South Korea with GSMA compliant Smart Connect solution to activate and manage eSIM device lifecycles

IDEMIA, the global leader in Augmented Identity, is proud to have been selected by SK Telecom, the number one telecommunication operator in South Korea, to launch the first eSIM Connected watch based on GSMA Consumer standards.

CONNECTIVITY

POSTED ON 11.20.18

As a leading actor in the telecom field, IDEMIA is at the forefront of the digital revolution and is committed to bringing protected and convenient experiences to mobile operator customers. Leveraging its industrial leadership and appetite for innovation, IDEMIA will be providing [SK Telecom](#) its GSMA compliant solution.

Based on IDEMIA's Smart Connect Subscription management solution also known as [remote SIM provisioning](#), the technology [remotely connects the eSIM of the smart watch to the SK Telecom's network](#) without inserting a physical SIM card. This technology is also compliant with the latest GSMA standards ensuring interoperability.

The solution enables remote and in-life management of mobile operator's subscription profiles in eSIM-capable wireless devices.

With this technology, users:

- **Do not need a physical SIM card**
- **Do not need to have their mobile phone with them**
- **Have seamless connectivity with their watches wherever they are, and they can manage their subscription easily**
- **Benefit from better security for the smart watch connection**
- **Enjoy the same communication habits, make calls, send texts from their smart watch.**

Thanks to IDEMIA's solution, its capabilities to deploy the solution in a short timeframe and the reactivity of its experts, SK Telecom has been able to be the first MNO in Korea to offer an eSIM connected watch based on GSMA Consumer Phase 2. The solution enables secure connectivity and convenience for the consumer.

SK Telecom

IDEMIA is very proud to have been selected by SK Telecom, the largest mobile network Operator in South Korea, to provide its latest eSIM Management platform to remotely connect watches. IDEMIA has a worldwide experience and the ability to provide the best technology to ensure a seamless experience for connected consumers thanks to its eSIM life cycle solution.

Fabien Jautard, Executive Vice-President for Mobile Operators activities at IDEMIA

About IDEMIA - OT-Morpho is now IDEMIA, the global leader in Augmented Identity, with the ambition to empower citizens and consumers alike to interact, pay, connect, travel and vote in ways that are now possible in a connected environment.

Securing our identity has become mission critical in the world we live in today. By standing for Augmented Identity, we reinvent the way we think, produce, use and protect this asset, whether for individuals or for objects. We ensure privacy and trust as well as guarantee secure, authenticated and verifiable transactions for international clients from Financial, Telecom, Identity, Public Security and IoT sectors.

With over \$3 billion in revenues, IDEMIA is the result of the coming together of OT (Oberthur Technologies) and Safran Identity & Security (Morpho). With 14,000 employees around the world, IDEMIA serves clients in over 180 countries.
