New Delhi, 27 June 2023 – IDEMIA, the global leader in identity technologies and biometric solutions, today announces that it has been selected as the technology partner by GMR Group for DigiYatra. “DigiYatra” is an industry-led initiative coordinated by the Aviation Ministry in line with Prime Minister Shri Narendra Modi’s Digital India vision to transform the nation into a digitally empowered society.

Over the last one and a half years, IDEMIA has worked tirelessly alongside DIAL in solution development and delivery of a live POC. Our solution was successfully tested, and IDEMIA was finally awarded the contract. Under this contract, DigiYatra will use IDEMIA’s facial recognition technology at Delhi, Hyderabad and Goa to verify the identity of domestic flyers, making terminal entry and security clearance at the airport a seamless, hassle-free, and paperless process.

IDEMIA, by applying its award-winning facial recognition and digital technologies, is contributing to DigiYatra by making travel more convenient for passengers while safeguarding their privacy and security. Contactless biometric technologies mitigate hygiene concerns and help regain the confidence of travelers. Advanced fingerprint, face, and iris recognition devices designed by IDEMIA for airports are not just ‘simple touchless technologies’—they identify travelers on the move, enabling greater efficiency and a smooth passenger journey while respecting the user’s privacy. It aims to provide Indian passengers with a novel and digital experience, making their flying experience smoother, faster, and more secure, for those who give the consent to use the DigiYatra platform.

Over the last 27 years in the country, IDEMIA has partnered with mission-critical and digital transformation projects in India like JandhanYojna and Aadhaar program. We are thrilled to collaborate and partner with GMR Group for DigiYatra, yet another exemplary digitalization initiative of the Government of India. As a market leader for passenger flow facilitation solutions, we strive to constantly innovate to safeguard passenger trust and help pave the way for even smoother and more secure future travel.

Matthew Foxton, India Regional President

We would like to express our sincere gratitude to GMR Group for entrusting us with the
A spokesperson for DigiYatra said, “Capturing the biometrics of people on the move – without slowing them down, especially at airports where long queues can lead to costly delays – is crucial. We are glad to partner with IDEMIA’s best-in-class Passenger Flow Facilitation solution, which will enable and speed up passenger clearance and increase security with embedded anti-spoofing capabilities with the least manual intervention” (this will be reviewed by DIAL).

IDEMIA has equipped over 250+ airports across the globe with its cutting-edge solutions, applying its award-winning biometric and digital technologies. Singapore’s Changi Airport, which has been named the “world’s best airport” for a record 12 times, is also powered by IDEMIA’s facial and fingerprint recognition technologies.

Alok Tiwari, Sr VP & Business Head, Public Security & Identity, India

About us - As the leader in identity technologies, IDEMIA is on a mission to unlock the world and make it safer. Backed by cutting-edge R&D, IDEMIA provides unique technologies, underpinned by long-standing expertise in biometrics, cryptography, data analytics, systems and smart devices.

IDEMIA offers its public and private customers payment, connectivity, access control, travel, identity and public security solutions. Every day, around the world, IDEMIA secures billions of interactions in the physical and digital worlds. With nearly 15,000 employees, IDEMIA is trusted by over 600 governmental organizations and more than 2,300 enterprises spread over 180 countries, with an impactful, ethical and socially responsible approach. About IDEMIA India - IDEMIA India has been a significant contributor to the group’s global success story, with almost one-third of its global workforce (5,000+ employees) based in India. Over the past 27 years, IDEMIA has partnered with the government and other major private sector players to implement mission-critical digital transformations in India, such as the Jan Dhan Yojna and Aadhaar program. We have an impressive list of clients in India, including UIDAI, top private and public banks, fin-techs, all top telecom service providers, and some state governments.

IDEMIA believes in ‘Made in India’ and has one of the world’s largest and best smart card factories at NSEZ in Noida. The group exports to over 300 destinations from this plant. We also leverage the technological expertise available in India, with the presence of global R&D and global digital platforms, to create innovative solutions for our clients across the world.
