

MorphoWave Compact by IDEMIA: new compact, frictionless access control terminal unveiled at ISC West

PUBLIC SECURITY & IDENTITY

IDENTITY & SECURITY, N.A.

POSTED ON 04/11/18

IDEMIA, the global leader in Augmented Identity, announces today the launch of **MorphoWave Compact**, the newest addition to its range of products for frictionless biometric access control. This masterpiece of engineering relies on IDEMIA's patented, touchless 3D fingerprint technology: it delivers the field-proven performance of the award-winning MorphoWave Tower in a stylish and compact reader, designed for wall-mounted access control and time & attendance applications.

MorphoWave Compact is 86% smaller than MorphoWave Tower, while retaining the same large scanning volume. It acquires four fingers in 3D for maximum accuracy, with one pass of the hand over the sensor. The ergonomic touchless operation delivers an unmatched combination of security, convenience and throughput. MorphoWave Compact's reduced size comes with a very competitive cost of ownership, an IP65 rating and a rich feature set to ensure that users can now experience frictionless access everywhere...with a simple wave of the hand.

As the global leader in fingerprint technology for more than four decades, IDEMIA has served the world's largest users of biometrics. Over the past ten years, IDEMIA has combined tremendous R&D efforts with large-scale, high volume deployments of touchless fingerprint technology, to ensure that frictionless biometric access is a proven reality today.

The overwhelming success of our MorphoWave Tower in major Fortune 500 companies – such as, so far, corporate headquarters, large manufacturing sites, prestigious universities, and some of the largest banks and financial institutions around the globe – not only proves the technology delivers on its promise, but also confirms the

potential and hunger to use it everywhere. We have designed MorphoWave Compact specifically with this in mind, to allow customers to leverage the technology beyond the lobby, at every door.

Philippe Barreau, Executive Vice-President of Citizen Identity and Public Security activities at IDEMIA

Visitors to the ISC West exhibition in Las Vegas (April 11 – 13, 2018) have the opportunity to discover MorphoWave Compact at booth #4071

About IDEMIA OT-Morpho is now IDEMIA, the global leader in Augmented Identity for an increasingly digital world, with the ambition to empower citizens and consumers alike to interact, pay, connect, travel and vote in ways that are now possible in a connected environment.

Securing our identity has become mission critical in the world we live in today. By standing for Augmented Identity, we reinvent the way we think, produce, use and protect this asset, whether for individuals or for objects. We ensure privacy and trust as well as guarantee secure, authenticated and verifiable transactions for international clients from Financial, Telecom, Identity, Public Security and IoT sectors.

OT (Oberthur Technologies) and Safran Identity & Security (Morpho) have joined forces to form IDEMIA. With close to \$3 billion in revenues and 14,000 employees around the world, IDEMIA serves clients in 180 countries.
