

AUGMENTED BORDERS™

IDEZIA's suite of products and services to help you design your border control solutions

1

Mr. Smith has been planning his dream journey for six months. He organized everything in the smallest details and obtained all the necessary authorizations for his trip.

Threat and risk assessment

As soon as Mr. Smith boards the plane, his data is sent to the country of arrival. Upon reception, his data is cross-checked against reference databases and analyzed via a risk assessment procedure, in compliance with law and privacy principles.

2

3

Pre-border processing anytime, anywhere

On his way to the country of arrival, Mr. Smith can fill in all the information requested by the border agency.

4

An efficient Entry/Exit System for a smart border clearance process

Mr. Smith's risk profile and eligibility to cross the border are checked within a few seconds. His entry/exit movements are registered into the national system.

5

A secure and fast border crossing experience

Upon his arrival, Mr. Smith breezes through the ABC³ gate. He is securely identified with his biometrics.

6

Smooth land border crossing

To speed up the border crossing process, Mr. Smith performs a simple, fast immigration pre-check. Now he can enjoy a quicker and more pleasant border crossing experience.

1: Electronic Travel Authorization
2: Advanced Passenger Information - Passenger Name Record
3: Automated Border Control
