When in-store, cardholders can pay with their numberless card or with the card's digitalized version on their smartphone. IDEMIA enables digital cards to be used immediately while waiting for the physical card to arrive, or in the case of a lost/stolen card.

0

PAYING ONLINE

For online payments, the cardholder can retrieve the card's PAN, CVV number, and expiration date required to make a purchase on the merchant's guest checkout page. IDEMIA enables you to display a virtual card number directly on the mobile banking application.

ADDRESSING YOUR CARDHOLDERS' NEEDS

With its extended set of solutions around numberless cards, IDEMIA enables you to offer Digital-First user experiences, bridging the physical and digital worlds. IDEMIA gives a concrete answer to your cardholders' needs to combine security, convenience and autonomy.

Securing cardholder payment data

Online payment fraud is increasing; numberless cards protect your cardholders from the threat.

Optimizing the user experience

Offering a numberless card with the related digital services brings more convenience to your cardholders, thus enhancing their satisfaction.

Giving control back to your cardholders

Let your customers take control over their payments and operations through an enhanced mobile banking application.
