

MAKING AIRPORTS SAFER WITH BIOMETRICS

FOR AIRPORT EMPLOYEES

Biometrics to protect restricted access areas

Contactless biometrics guarantee that only authorized personnel can access sensitive areas with ease.

100,000+
EMPLOYEES WORKING

at Paris Roissy
Charles de Gaulle airport¹

including **86,000** holders of a special authorization to work in a restricted area

Biometrics in smart video analytics

7.8 BILLION
PASSENGERS

are predicted to use airports to travel over the next 20 years²

Reunite a lost child with parents

Identify the owner of suspicious luggage

Raise an alarm on the presence of a person of interest

208,000
PASSENGERS/DAY

at Paris Roissy
Charles de Gaulle airport³

2 TIMES

the capacity of the Camp Nou in Barcelona, the biggest European football stadium

FOR PASSENGERS

Biometrics to authenticate passengers' identity

Multibiometric technology conducts fast and reliable identity verification throughout the passenger journey: from remote check-in using a dedicated app to immigration and boarding.

BAG DROP

BORDER CONTROL

AIRCRAFT BOARDING

Contactless biometric technologies not only improve the travel experience, but also enhance the level of security worldwide. They help airports contribute to the fight against illicit activities and illegal immigration.
